The rehabilitation of the severe burn requires multidisciplinary care in a specialized rehabilitation center. We present in this article, the care offered in our service, detailing in particular the psychological aspects. Indeed, some patients with severe burns have a psychiatric history, while others will present a status with post-traumatic stress disease following the burn. The general ...

### **[Severe burned patient rehabilitation].**

Prevention of scarring should be the aim of burn management. For every member of the burn team, rehabilitation must start from the time of injury. Having a substantial burn injury is frightening, particularly as patients will not know what to expect and will be in pain. Consistent and often repetitive education is a vital part of patient care.
