File Processing System vs Database Approach. Summary: Difference Between File Processing System and Database Approach is that in the past, many organizations exclusively used file processing systems to store and manage data. In a typical file processing system, each department or area within an organization has its own set of files.

### **Difference Between File Processing System and Database ...**

XML databases are a type of structured document-oriented database that allows querying based on XML document attributes. XML databases are mostly used in applications where the data is conveniently viewed as a collection of documents, with a structure that can vary from the very flexible to the highly rigid: examples include

scientific articles, patents, tax filings, and personnel records.
