Math 4740: Stochastic Processes

Building upon the previous editions, this textbook is a first course in stochastic processes taken by undergraduate and graduate students (MS and PhD students from math, statistics, economics, computer science, engineering, and finance departments) who have had a course in probability theory. It covers Markov chains in discrete and continuous time, Poisson processes, renewal processes, martingales, and option pricing. One can only learn a subject by seeing it in action, so there are a large ...

(PDF) Essentials of Stochastic Processes - ResearchGate

Review "This is the third edition of a popular textbook on stochastic processes. It is intended for advanced undergraduates and beginning graduate students and aimed at an intermediate level between an undergraduate course in probability and the first graduate course that uses measure theory." (William J. Sotzger, MAA Reviews, maa.org, February, 2017)

Throughout the book there are many new examples and problems, with solutions that use the TI-83 to eliminate the tedious details of solving linear equations by hand. My students tell me I should just use MATLAB and maybe I will for the next edition. The Markov chains chapter has been reorganized. The chapter on Poisson processes has moved up from third to second, and is now followed by a ...
