Flaresim Software

Flaresim is the industry standard flare simulation/design application. Designed by professional engineers, for professional engineers, it models thermal radiation and noise footprints generated by flare systems for offshore platforms, gas plants, refineries and chemical plants, and predicts the temperature of exposed surfaces within range.

Flaresim - Schlumberger Software

Flaresim flare systems design and analysis software is the industry standard flare simulation and design application. Designed by professional engineers, for professional engineers, it models thermal radiation and noise footprints generated by flare systems for offshore platforms, gas plants, refineries, and chemical plants and predicts the temperature of exposed surfaces within range.

Flaresim 6.0 - Schlumberger Software

Flaresim is the industry standard flare simulation/design application. Designed by professional engineers, for professional engineers, it models thermal radiation and noise footprints generated by flare systems for offshore platforms, gas plants, refineries and chemical plants, and predicts the temperature of exposed surfaces within range.

Flaresim 5.3.1 - software.slb.com

The Locker Heatshielding team use Flaresim software to calculate radiant heat levels for both onshore and offshore installations. The software is used to specify the optimum location and construction of Heatshields, to provide the correct level of protection for both key equipment and personnel.

Flaresim Analysis - Locker Radiant Heat Shielding

Flaresim Ltd developed Flaresim, the industry-standard software for estimation of thermal radiation from a flare system. The software models thermal radiation and noise footprints generated by flare systems, and predicts the temperature of exposed surfaces within range. It performs full 3D flame-shape analysis with complete flexibility in the location and orientation of multiple stacks, and rapid evaluation of flare systems under different wind speeds and directions.
