Matching Rock Layers Lab Answer

LAB 5-2: MATCHING ROCK LAYERS INTRODUCTION: Geologists can determine the relative ages of the rock layers in a rock formation. But how do they determine whether the rocks or geologic events occurring at one location are of the same age as those at another location? The process of showing that rocks or geologic events occurring at different locations are of the same age is called correlation ...

As the needs of the modern laboratory vary widely from lab to lab, what is needed from

a laboratory information management system also shifts. The end result: the definition of a LIMS will shift based on who you ask and what their vision of the modern lab is. Dr. Alan McLelland of the Institute of Biochemistry, Royal Infirmary, Glasgow highlighted this problem in the late 1990s by explaining ...
